EDUCATION

M.Tech Artificial Intelligence – BITS Pilani
Expected: May 2025 | CGPA: 8.2/10

SUMMARY

ML engineer with focus on NLP and generative AI. Built and deployed LLM-powered applications.
Strong Python background, experience with cloud infrastructure.

SKILLS

Python, PyTorch, TensorFlow
OpenAI GPT-4 API, Google Gemini API
LangChain, Prompt Engineering, RAG
FAISS, Weaviate, ChromaDB
FastAPI, Flask, Docker
GCP (Cloud Run, Cloud Storage), Azure OpenAI Service
Git, MLflow

EXPERIENCE

AI Engineer Intern – FinTech Startup, Mumbai (Aug 2024 – Jan 2025)

- Built internal knowledge assistant using LangChain + Weaviate for 200+ employee company wiki
- Implemented query rewriting and re-ranking to improve retrieval quality
- Deployed on GCP Cloud Run; handled 300+ daily queries with 99.1% uptime
- Reduced hallucination rate by 40% through structured output validation

PROJECTS

Legal Document Summarizer

- LangChain pipeline for summarising 100+ page contracts; map-reduce summarisation strategy
- OpenAI GPT-4 with structured JSON output using Pydantic models
- FastAPI backend + Docker; deployed on GCP

Multi-modal Product Recommender

- Combined text embeddings + image features for e-commerce recommendations
- FAISS vector store with approximate nearest neighbour search
- 23% CTR improvement over baseline in A/B test

CERTIFICATIONS

- DeepLearning.AI: Generative AI with LLMs
- GCP Professional Data Engineer
